To: Current AUCP Inventory Tracking System Administrators
From: Director John Hudak, Office of Cannabis Policy
Date: August 12, 2025
Subject: Supplemental Instructions for Accessing and Using the Metrc Industry Sandbox

Background

On August 4, 2025, Maine's adult use cannabis inventory tracking vendor, Metrc, announced the availability of a new Metrc Industry Sandbox. The Metrc Sandbox is a secure, simulated training system developed in response to user feedback. The Office of Cannabis Policy (OCP) is providing these instructions to ensure that Maine licensees are aware of this new functionality and to supplement the [bulletin](#) provided by Metrc.

Instructions

How to access the Metrc Sandbox:

- To initiate access to the Metrc Sandbox, begin by logging into your Metrc account.
- Once logged into your Metrc account, select the **Support Dropdown Menu** seen on the top right-hand side of the screen. Please see Figure 1 below.

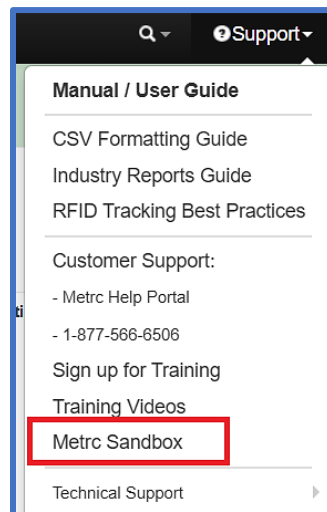

Figure 1 – Support Dropdown Menu

- From the **Support Dropdown Menu** select the newest option offered, “Metrc Sandbox”.

- Once “Metrc Sandbox” has been selected, the action window seen in Figure 2 will appear. From here, enter in the same email address that is associated with your Metrc account and select the “Set up Metrc Sandbox” button.

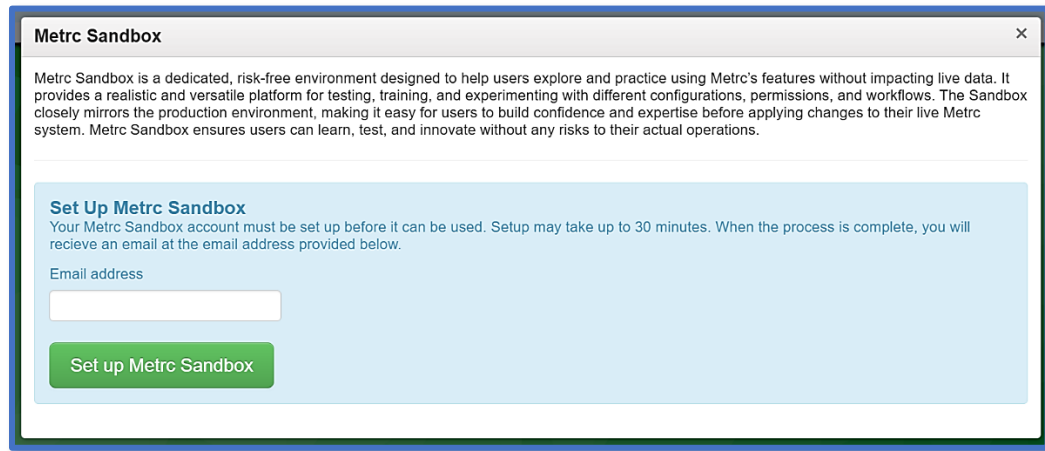

A screenshot of a web application window titled "Metrc Sandbox". The window has a light gray header bar with the title and a close button. Below the header, there is a paragraph of text explaining the purpose of the Metrc Sandbox: "Metrc Sandbox is a dedicated, risk-free environment designed to help users explore and practice using Metrc's features without impacting live data. It provides a realistic and versatile platform for testing, training, and experimenting with different configurations, permissions, and workflows. The Sandbox closely mirrors the production environment, making it easy for users to build confidence and expertise before applying changes to their live Metrc system. Metrc Sandbox ensures users can learn, test, and innovate without any risks to their actual operations." Below this text, there is a light blue box containing the heading "Set Up Metrc Sandbox" and a subtext: "Your Metrc Sandbox account must be set up before it can be used. Setup may take up to 30 minutes. When the process is complete, you will receive an email at the email address provided below." Underneath the subtext, there is a label "Email address" followed by a white text input field. At the bottom of the light blue box, there is a green button with the text "Set up Metrc Sandbox".

Figure 2 – Metrc Sandbox Action Window

- Following the submission of the email address associated with your Metrc account, a confirmation banner will appear letting you know that the setup of the Metrc Sandbox is currently in process. See Figure 3.

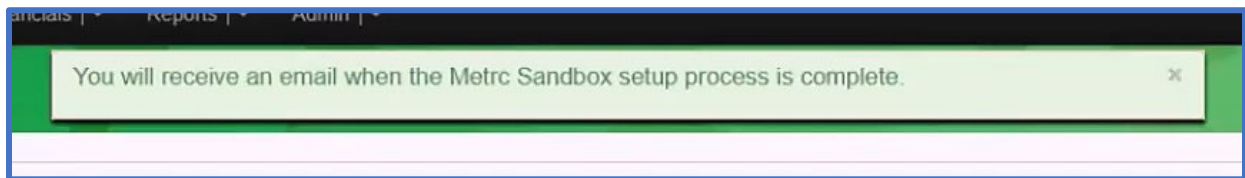

Figure 3 – Confirmation Banner

- When the setup process has been completed, you will receive an email containing the next steps to take. **This portion of the setup process will take approximately 15-30 minutes.**

- Once the email containing the next steps has been received. Click the link provided within the email to be taken directly to the Metrc Sandbox. See Figure 4 below. Please keep in mind that you will be provided with an active link which will expire.

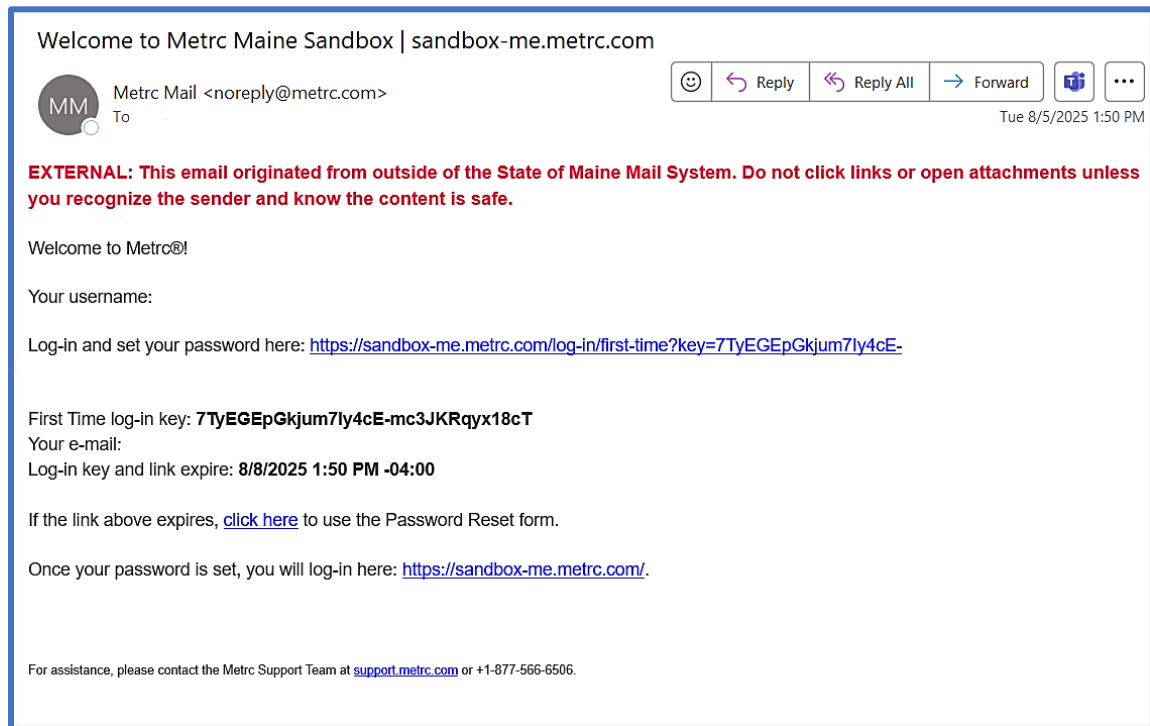

Figure 4 – Confirmation Email

- Upon first entry into the Metrc Sandbox, you will be presented with a user agreement. Please review this agreement and accept in order to proceed.
- Once this agreement has been accepted, you will automatically be logged into the Metrc Sandbox and can begin using the sandbox immediately. See Figure 5 below.

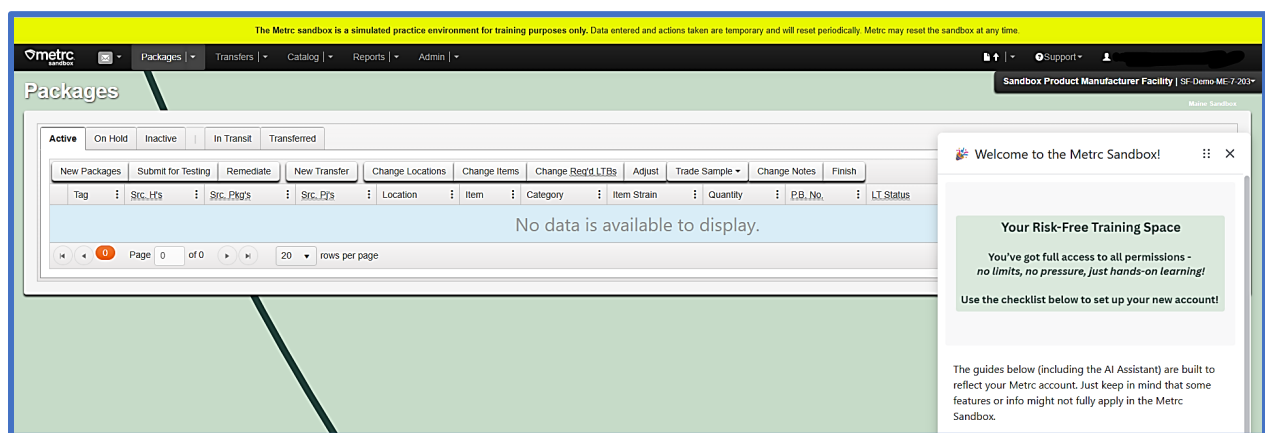

Figure 5 – Metrc Sandbox

How to exit the Metrc Sandbox:

- To exit out of the Metrc Sandbox, simply close the tab you were working from, and this will automatically remove you from the Sandbox.

How to access the Metrc Sandbox post-registration:

- In order to gain access back into the Metrc Sandbox, log into your Metrc account, and navigate to the **Support Dropdown Menu**. Just as before, select the option titled “Metrc Sandbox”. See Figure 6.

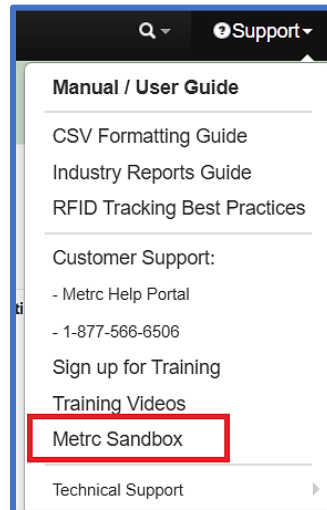

Figure 6 - Support Dropdown Menu

- Once selected, an action window will appear to confirm that you are leaving your Metrc account and entering the Metrc Sandbox. Once this action window is present, select the “Go to Metrc Sandbox” button in order to regain access. See Figure 7.

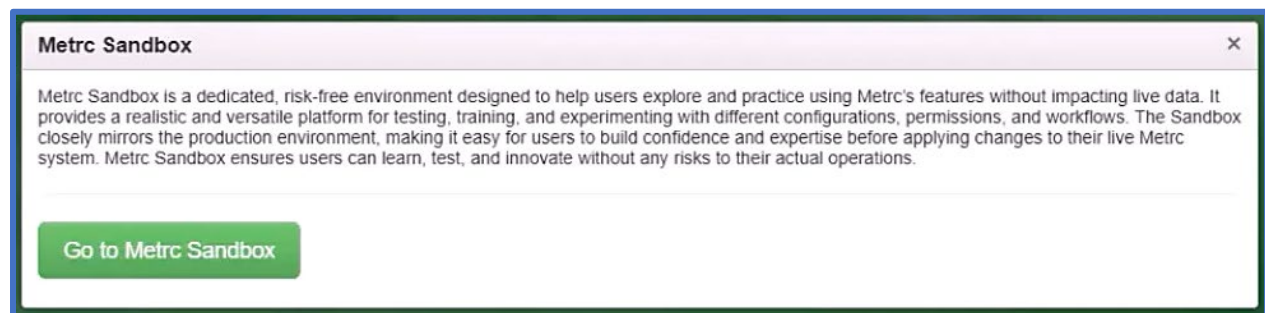

Figure 7 – Go to Metrc Sandbox Action Window

Additional tips for using the Metrc Sandbox:

- Ensure the bright yellow banner is present in the Metrc Sandbox before action is taken. If the yellow banner is not present, you are not working the Sandbox and are still in Production.
- Metrc Expert will also be seen in bright yellow, making it easy to distinguish between Production and the Sandbox.
- The Metrc logo, seen in the top left-hand corner of the screen, will read as “Metrc Sandbox” and not just “Metrc” as it does when in Production.
- The actions taken in the Metrc Sandbox are for training, practice, and experimental purposes only; these actions will not have any impact on a facility’s inventory.
- All areas of Metrc will be accessible within the Metrc Sandbox and each user will be provided with full permission to do as they please.
- Any work completed within the Metrc Sandbox will not be saved. The Sandbox will reset back to its default periodically.

Additional resources provided by Metrc:

- [Metrc Learn](#) has debuted a new tutorial designed to walk users through the process of setting up and using the new Metrc Sandbox. See Figure 8 below.

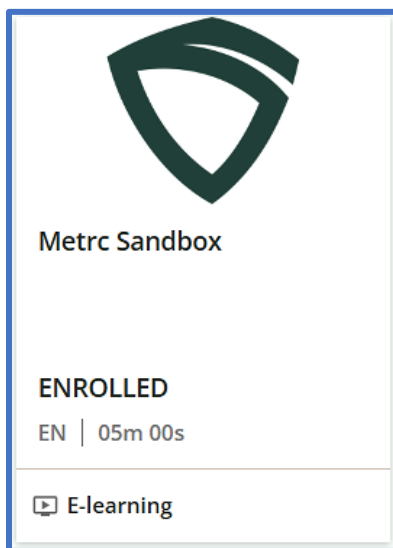

Figure 8 – Metrc Sandbox Tutorial via Metrc Learn

- Seen within [Maine’s Bulletin Database](#), Metrc has published the [Metrc Industry Sandbox Bulletin](#) for users to follow along with as they sign up and begin using the Sandbox.
